

VM BACKUP

Hyper-V | VMware

Lighter, faster and better with Augmented Inline Deduplication technology.

Massive storage savings

Lower storage requirements with our Augmented Inline Deduplication technology.

Lightning-speed performance

Boost server performance with faster backups.

Unbeatable Value

A highly capable VM backup solution without the budget drain.

Trying to find a backup solution for Hyper-V and VMware which you can rely on is a real challenge. You risk spending a huge chunk of your budget on software that is bloated with features you don't need, that is hard to manage, and impossible to get support on.

We believe in solid backup software that does what it says it will, is intuitive and easy to use, well-priced, and most of all offers outstanding support as part of the package. Altaro VM Backup is a full-featured, affordable backup solution for Hyper-V and VMware virtual machines, backed up by a personal support team that is determined to help you succeed in protecting your environment.

Over 30,000 customers

Priced per host, not per socket

Praise winning support team

Expert-level features a few clicks away

Altaro VM Backup makes it easy to protect your Hyper-V and VMware virtual machines, but offers you advanced controls and the ability to create and execute a backup strategy you can rely on.

Augmented Inline Deduplication of backups across VMs: drastically reduce backup storage requirements on both local and offsite locations, and therefore significantly speed up backups.

Boot from backup: Instantly boot any VM version from the backup location without affecting backup integrity. The VM may optionally be restored in the background while booted without losing any changes.

Replicate your backups for better protection: Altaro VM Backup makes it easy to replicate your VM backups to an offsite location over the internet, boosted by WAN Acceleration.

Granular, fast restore options: Restoring individual files or Exchange Server emails from your VM backups has never been easier. Browse through your data as you would with a local drive and instantly restore the items you need, without having to restore the whole VM.

Flexibility when you need it: Failing VM? Use your VM backup instantly to replace a failed VM temporarily and save any changed data once you restore the VM fully. Want to restore a VM but not replace/overwrite the live VM? Simply restore a clone of your VM backup with a couple of clicks. Moving VMs? Just restore VM backups to a different host.

Be confident: There's no better way to sleep well at night than by being able to verify backups, and do so automatically on a schedule. Let the Sandbox restore function take care of that for you and get notified right away of any issues.

A UI designed for ease of use: Altaro VM Backup takes an intuitive, logical approach to backup/restore configuration and execution. We invest in your user experience, making the software easy to get along with and effective to accomplish what you need, when you need it most.

Advanced control over your backups: Flexibility is everything. Being able to run concurrent backups, queue or pause jobs, back up your VMs to multiple primary locations, back up live VMs on the fly or back up cluster shared volumes (and more) gives you options to customize a backup plan to suit your needs best.

ALTARO CLOUD
VMBACKUP MANAGEMENT
CONSOLE

Altaro's ground-breaking Cloud Management Console (CMC) allows you to monitor & manage all your Altaro VM Backup installations from a single Cloud console.

Built for IT resellers or MSPs, It offers:

- **Multi-tenancy:** Designed to monitor & manage multiple hosts or customers (if you're an IT Reseller).
- **Real-time status updates:** View live operation activity and backup results as they occur.
- **No additional software:** Simply use a Web browser.
- **Access portal anywhere:** There is no need for VPNs to be on-site.
- **Access to Altaro VM Backups for MSPs program:** IT Resellers can manage their Altaro MSP subscription invoicing, billing etc.

	STANDARD EDITION Pay per host	UNLIMITED EDITION Pay per host	MSPs Pay per VM per Month
Number of Virtual Machines that can be backed up and restored per host	5 VMs per Host	Unlimited VMs per Host	Unlimited VMs, cost is per VM not per host'

Priority Technical Support	✓	✓	✓

Altaro VM Backup boasts best-of-breed augmented inline deduplication technology that significantly speeds up backups and reduces storage requirement, Boot from Backup, which makes it possible to boot any VM version from the backup location instantly, without affecting its integrity and much more.

The latest version of our backup solution supports Hyper-V hosts running Windows Server 2016, and features many innovations that make it even lighter, run faster, and deliver better performance for small- to medium-sized businesses specializing in backup for virtualized environments.

It's easy and fast to set up a solid backup strategy for your organization. Simply install the software and start your first VM backup in under 15 minutes. You don't need to be an expert to use VM Backup, you don't need any additional software to run it, and pricing is just as straightforward.

Satisfied clients

SEIKO

“ I have looked at Dell AppAssure, Symantec Backup Exec, Veeam Backup, Acronis, Overall, yours is just as good if not better, much more simple (and I like simple), and did I mention you have the best price also?

David Owen, IT Manager, The McNeely Companies

“ Altaro VM Backup is the best backup software I have ever used, you can go from downloading it to having a backup ready in 10 minutes. The support desk have been great, they answered any question quickly and effectively.

Simon Gay, Technical Consultant, Sicon Ltd.
