

AnyBackup 6.0

Enterprise Data Protection

AnyBackup protects virtual, physical and cloud environments in one product, specifically designed for the diverse challenges such as complex environments, exponential data growth and high TCO. Up to now, it has ranked No.2 in domestic PBBA market for three consecutive years.

Highlights

Comprehensive Protection

Eliminates the management complexity of multiple point solutions

- Virtual, physical and cloud environments protected in one solution
- Industry-leading environment compatibility
- Continuous data protection (CDP)
- Remote replication
- Automatic policy-based management

High Performance

Ensures remarkable backup and recovery performance

- PB level data protection capability
- 3rd generation data deduplication
- LAN-Free backup and recovery
- CBT backup (Changed Block Tracking)
- Multi-channel backup

Low TCO

Optimizes capital investment

- Solution integration with AnyBackup Cloud, AnyShare and AnyRobot
- Scale-out architecture for flexible expansion
- Unified management for remote offices and branches offices (ROBOs)
- Centralized monitoring for resource and job status
- Rich and customizable reports

As-a-Service Experience

Integrates with AnyBackup Cloud to improve service levels

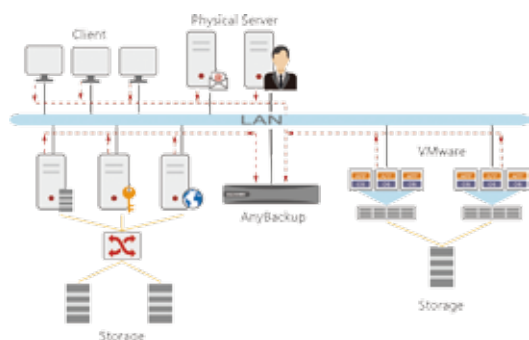

- On-demand purchase
- Tenancy isolation for data security
- Flexible on-premises or in-public-cloud deployment
- Continuous operation services
- Block storage or S3-based cloud storage optional

Supported Environments

Operating System	Database / Application	Virtual / Cloud Platform	Cloud Storage	
<ul style="list-style-type: none"> · Windows · Linux · AIX · Solaris · HP-UX 	<ul style="list-style-type: none"> · Oracle, Oracle RAC · Oracle Exadata · SQL Server · MySQL · Active Directory · Exchange Server · PostgreSQL · DB2 · Domino · Sybase · SAP HANA · MongoDB 	<ul style="list-style-type: none"> · VMware · Hyper-V · FusionSphere · CAS · OpenStack · H3Cloud 	<ul style="list-style-type: none"> · Alibaba Cloud · Azure · AWS · UCloud · E Cloud · Huawei Cloud 	

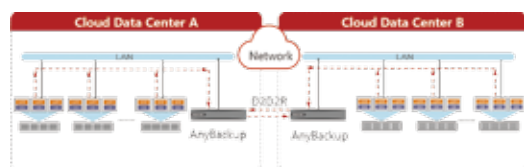

Solutions

Unified Protection Solution

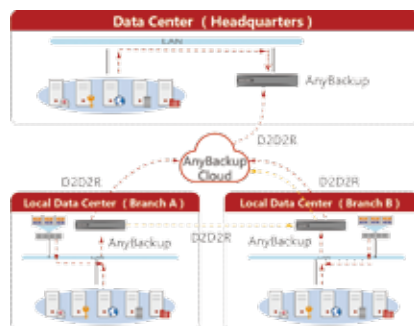

- **Unified Protection:** Centrally protects physical and virtual environments to streamline solution and enhance the management efficiency.
- **Broad Compatibility:** Can be compatible with popular operating systems such as Windows, Linux and applications such as VMware, Hyper-V, Oracle, MySQL, Exchange Server and more.
- **Efficient Protection:** Enhances data protection efficiency by technologies such as data deduplication, LAN-Free backup and recovery, instant recovery, granular recovery and more.
- **Higher RPO:** Integrates backup, CDP and disaster recovery in one solution to satisfy different RPO requirements.

Cloud Data Center Protection Solution

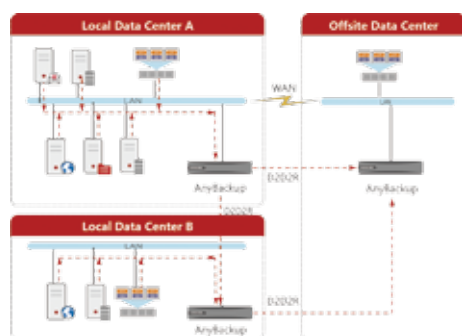

- **Broad Compatibility:** Supports protection for cloud platforms including OpenStack, VMware, Hyper-V, FusionSphere, CAS, CNware and more.
- **Fast Backup:** Improves backup efficiency by data deduplication, LAN-Free backup and recovery, and more.
- **Tenancy Isolation:** Ensures independence of data protection businesses of multiple tenants.
- **Heterogeneous Cloud Migration:** Flexibly migrates data among VMware, H3Cloud and FusionSphere.

Shared Protection Solution

- **Unified Management:** Performs central monitoring and management for branches by integrating with AnyBackup Cloud, other than ensuring local and offsite data protection.
- **Duty Separation:** Ensures business and data isolation among branches using strict permission control and access mechanism.
- **Wide Application:** Supports one-to-one, one-to-many, many-to-one, and cascading replication to satisfy flexible offsite disaster recovery demands.
- **Flexible Scalability:** Supports Scale-out expansion, so as to avoid repetitive investment with the business growth.

Three Data Center Protection Solution

- **Flexible Protection:** Supports local data protection, offsite disaster recovery and three data center protection to satisfy various protection demands.
- **High Efficiency and Security:** Ensures replication efficiency and security by features including compression, data deduplication, resumable data transfer, encryption and more.
- **Cascading Replication:** Data synced to the destination can be synced to another destination to achieve multiple backup.
- **High Recoverability:** Can restore business data from local or offsite to satisfy different data damage scenarios.

Authorized Distributor :

HQ Office (KL)

SecureOne Distribution Sdn Bhd (828358 - X)
No. 7, Jalan 109E, Desa Business Park,
Taman Desa, Jalan Kelang Lama,
58100 Kuala Lumpur, Malaysia.

Tel : +6 (03) 7984 6086 Fax : +6 (03) 7984 6032
Email : sales@secureone.com.my

Southern Office

SecureOne Distribution Sdn Bhd (828358 - X)
33-01, 33-02, Jalan Austin Heights 8/3,
Taman Mount Austin, Johor Bahru,
81000 Johor, Malaysia.

Tel : +6 (07) 362 1867 Fax : +6 (07) 362 1867
