

Monitor everything with PRTG

Firewall

- PRTG monitors your entire inbound/outbound network traffic
- Receive constant updates about the status of your firewall
- Automated notifications when network security is in any way compromised

Cloud

- PRTG offers a quick overview of all major cloud service providers
- Monitor services, applications and appliances with standard protocols
- Gain visibility to hybrid cloud infrastructure deployments and costs

Application

- PRTG monitors SQL, Exchange & server software
- PRTG monitors your cloud and virtualized applications
- PRTG monitors nearly every standard application

Traffic

- PRTG offers a quick overview of your traffic
- Customizable thresholds for prompt notifications
- Identify utilization spikes & unusual traffic patterns

Healthcare

- DICOM and HL7 support
- PRTG combines IT and medical infrastructure
- Monitor RIS, HIS, PACS, LIMS, and communication servers

VPN

- Monitor VPN connections and the local network
- Measure traffic, load, and the number of users
- Identify connection problems and suspicious traffic

VoIP

- QoS Monitoring & IP SLA Monitoring. All in one.
- PRTG monitors the VoIP quality and runs VoIP latency tests
- PRTG alerts you before phone errors occur

Bandwidth

- Analyze your network bandwidth with PRTG
- PRTG detects bandwidth overloads
- PRTG Bandwidth monitor supports SNMP, WMI, Packet Sniffing and Netflow

Server Health

- Monitor server health with PRTG
- Get an in-depth overview of the performance of servers, applications, and services
- Create custom maps with all the essential data regarding your servers

Server Room

- PRTG ensures reliable monitoring of server rooms
- Monitor temperature fluctuations, humidity, and power outages
- In case of problems you get automatic alerts

Printer

- Monitor paper, toner, and more
- With PRTG you know the status of every printer
- Detailed printer error messages at a glance

Network Discovery

- Find network devices automatically
- Nonstop network monitoring
- Cross-locational monitoring

CCTV

- Monitoring of the entire CCTV environment
- Native support for the most common CCTV vendors
- Individual maps and automatic positioning on geo-maps

IoT

- Monitor your IoT processes with MQTT
- Gain insights into manufacturing processes
- Integrate environmental data into your IT monitoring

Remote

- Unified monitoring – one tool to monitor all your infrastructure
- Monitoring of unlimited multiple sites with every license
- TLS-supported remote monitoring without VPN
