

Sophos Central Firewall

Sophos Central Firewall Management and Reporting

Sophos Central is the ultimate cloud management and reporting ecosystem for your Sophos Firewall estate. Whether you are managing a single firewall or hundreds, Sophos Central makes it easy – and free. Take advantage of zero-touch deployment, group firewall management, and flexible reporting tools - all at no extra charge.

The ultimate security ecosystem

Sophos Central is your gateway to all your Sophos products, enabling you to have the best protection at every point. You also get integrated and synchronized information sharing and threat response, all managed from a single easy-to-use cloud console that delivers unmatched visibility and insight.

Synchronized Security

Sophos Central is your one and only console for managing Sophos Synchronized Security. You can manage and deploy Sophos Intercept X to your endpoints, servers, and mobile devices, while also deploying Sophos Firewalls or SD-WAN devices to your various branch office or remote locations. Then, put your cybersecurity on autopilot and use Sophos Central to monitor and manage everything from a single pane of glass.

Group firewall management

If you're managing multiple firewalls, keeping them consistent, synchronized, and up to date can be a big challenge. Sophos Central makes it simple. Powerful group management options enable you to easily group firewalls together to keep their group policy synchronized. Simply make a change to the group policy once, and it will be automatically synchronized across all firewalls in the group, helping ensure your network is consistent and compliant.

Multi-Firewall Reporting

Central Firewall Reporting (CFR) provides you with a powerful set of tools to capture and analyze network activity from your Sophos Firewall estate. Log data from all your firewalls is sent to your Sophos Central account in the cloud, where you can get clear picture of your network activity in one place - without - having to access each device individually. Report across your entire estate, a specific group, or drill down into a specific firewall with ease.

Pre-defined and custom reports

Start with any of the convenient predefined reports and build your own story by changing the data fields, visualization options, and filters. Customize each report and create hundreds of variations from any report to visualize the data and trends for your specific use case, then export the data or schedule the reports to be sent to stakeholders on a regular basis.

Network intelligence through analytics

Gather network intelligence by drilling deep down into your firewall syslog data for a granular view presented in an intuitive and visual way. The data can then be analyzed for trends that identify security gaps, suspicious user behavior, or other events requiring policy changes.

Log backup and management

Sophos Central Firewall Reporting logs data from your Sophos Firewalls with smart indexing and easy search capabilities for fast retrieval, audits, and forensics. Built-in filters enable you to pivot from a report directly into the log

data for a more detailed look at what's behind the data in the report view.

Help with compliance

Group firewall policy synchronization, the task queue, and detailed reporting help you keep up with regulatory and internal compliance requirements. In the event of a compliance audit, you can report on network events at any point in time.

Central backup and firmware updates

You can use Sophos Central to store your firewall configuration backups in the cloud for convenient access should you ever need them. Your last five backup files are automatically maintained, as well as one you can "pin" as a favorite. Sophos Central also makes scheduling firmware updates a simple operation so you can keep your network optimized with the latest features, performance, and security patches without disruption.

Enable Managed Threat Response

Sophos Central Reporting enables you to connect your Sophos Firewalls into Sophos 24/7 Managed Threat Response (MTR) service to share network threat telemetry. Specifically, the Sophos Firewall connector provides MTR analysts with ATP and IPS events to enhance threat hunting and investigations on your network.

How to buy

Sophos Central Management and Central Firewall Reporting are included with Sophos Firewall running v18 and newer firmware at no additional charge. Licenses to add additional reporting features and storage capacity for Central Firewall Reporting to extend the data retention period can be purchased with a CFR Advanced license. The Xstream Protection bundle for Sophos Firewall includes CFR Advanced with 30-days storage at no extra charge. Log data is stored on a first in, first out (FIFO) basis. See the table below for more information.

FEATURES	CFR	CFR ADVANCED
Data retention	Limited storage capacity – up to seven days of retention	Scalable storage capacity - up to 365 days of retention
Syslog search and view	Yes	Yes
Syslog data storage in Sophos Central	Yes	Yes
On-demand reporting in Sophos Central	Yes	Yes
Report across multiple firewalls	No	Yes
Save, export, and schedule reports	No	Yes
XDR/MTR connector	No	Yes

FEATURES	CFR	CFR ADVANCED
Pricing and Licensing	No additional cost – perpetual use	Purchase added data storage per firewall

Features list and technical specifications

Supported Firewalls

- › Sophos Firewalls running v18 or later firmware, including hardware, software, virtual, and cloud
- › Scheduled firmware updates requires SFOS v18 MR3 or later

Firewall Management

- › Group firewalls to keep group policy and setting synchronized
- › High-Availability (HA) support
- › Backup file management
- › Firmware updates from Sophos Central
- › Schedule Firmware updates for any date/time
- › Zero-touch deployment using a USB flash drive
- › Task queue tracks all firewall group synchronization activity for monitoring and auditing changes

Log View and Search

- › Search and retrieve logs against archived logs administration
- › Web-based management console
- › Report dashboard for quick at-a-glance view of health
- › Reports accessible from any location using a standard web browser

Firewall Reporting

- › Extensive built-in report modules with customization tools
- › Report across individual firewalls, multiple firewalls, groups, or all firewalls (CFR Advanced only)
- › Save, export or schedule reports (CFR Advanced only)
- › Standard reports: bandwidth usage, application usage, web usage, firewall, ATP, geo-activity, IPS, Sandstorm events, and more
- › Multi-format reports: tabular, graphical
- › Custom and special reports with granular search options
- › XDR/MTR Connector to integrate Sophos Firewall with Sophos XDR and Managed Threat Response Service (CFR Advanced only)
